

January 9, 2026

Hello & Happy New Year to All:

As we begin new calendar year, I am providing this brief (I hope..), personal, overview of matters involving the OLSBA WPCA and the “Sewer Project”.

— The next meeting of WPCA is January 13, 2026, at 7:00 pm. Attending the meeting will be Atty. Norbert Church who will review and discuss with the WPCA members state statutes and procedures which the WPCA will need to follow when sewer construction begins.

— For reference, in CY 2026, our regularly scheduled WPCA meetings are scheduled for the second Tuesday of each month.

— As you may be aware in December 2025, the Town did not pass a proposed Bond Resolution designed to increase the Town’s projected fiscal appropriation relating to the “Sewer Project”. Another participant, Miami Beach, did pass its Bond Resolution.

— At this time, given that the three beaches remain under an Administrative Consent Order, I am of the understanding that the state would like to continue working toward a sewer project solution with the three beaches.

— The state DEEP has just scheduled a meeting with the three beaches for early next week (January 12, 2026). What the state’s specific intent & planned funding sources & plans about the project and its future is unclear (at least to me at this time).

— In December 2025 our Board of Governors recommended project construction vendors for both the “Shared” and “Internal” sewer projects to DEEP. The recommendations are presently being considered by DEEP.

There is much to be considered as the “Sewer Project” proceeds.

Thanks to all for your interest and support.

Jay Moynihan
